Profile

Hello there! I'm Anusha Malviya, a second-year BTech student with a fervor for crafting immersive web experiences. Currently navigating the exciting world of technology, I find joy in translating ideas into beautiful, functional websites. My journey into web development began with curiosity and has since evolved into a creative adventure.

Projects

Currency Converter

In a globalized world where international transactions are commonplace, there is a need for a simple and efficient tool to convert currencies accurately. The Currency Converter project aims to provide users with a user-friendly application that allows them to convert value between different currencies.

Gripper Robot

We made a pick-and-place robot using the basic knowledge of circuits consisting of motors of different RPMs, Lithium-ion batteries, DPDT switches, and wires of different kinds. The actual weight the model can lift is around 200 grams.
